

What's Behind #SabalTrailPipeline?

FPL's Scheme to Profit at Public Expense... threatening the environment and the economy

SABAL TRAIL PIPELINE: Sabal Trail is a 515-mile underground, fracked gas pipeline running through Alabama, Georgia and Florida. Owned by Spectra Energy, NextEra (FPL's parent company) and Duke Energy. Construction has begun and is to be operational by June 2017.

ENVIRO RISKS: 1. Gas pipeline leaks are extremely flammable and explosive. 2. Methane is a potent green house gas. 3. The pipeline will cross the most exposed part of the Floridan Aquifer, home to hundreds of springs, lakes, streams and wetlands, risking pipeline collapse, explosion, fire, and contamination of our fresh water and drinking supplies. *Florida is a beautiful state that depends on clean water and healthy fauna. Let's keep it that way.*

BAD for FLORIDA: The pipeline is unnecessary; energy demand is decreasing. Any added demand can be met with Energy Efficiency & Renewable Energy, with more jobs and less cost.

FPL's AGENDA: Florida Power & Light, a private, for-profit, utility monopoly, has ratepayers paying \$3.2 billion for a pipeline FPL admits they do not need. 160 properties are being seized by eminent domain. Facilities are being constructed near ports and railways of Florida. In other words, preparations for export. *Sabal Trail is for investors. Not Florida!*

GREEN ENERGY DERAILED: Fossil fuel infrastructure stalls Green Energy. "Natural gas" is no "transition fuel." Kelcy Warren of ETP, builder of the Dakota Access Pipeline (DAPL) asserts, "The pipeline business will overbuild until the end of time." Overbuilding pipeline locks Florida into dependence on fossil fuels, & delays green energy by decades.

WHO SUFFERS? Water, Nature, People, Economy, Green Energy, Climate. : (

What Can You Do? Call on those in power to rescind the permits:

- Florida Governor Rick Scott 850-717-9337
 - Army Corps of Engineers 904-232-2477
 - President Obama 202-456-1111 or 202-456-1414
- Be polite and professional on the phone! :)

#DAPL of the South

Urgent Sabal Trail **Call to Action!**

#SabalTrailPipelines = 515 mile natural gas (fracked methane) pipeline from Alabama to Florida, plus staging areas, compressor stations & methane facilities, to be operated by SPECTRA (poor safety record, recent spontaneous explosions in AL). FL's aquifer, waterways, rivers, springs, lakes are in imminent danger, indigenous burials sites being disturbed, people's property taken via eminent domain.

Ask Legislators to call for earlier Sabal Trail Pipeline Hearings to challenge the Environmental Impact Studies - **now**, not in May. The Pipeline is scheduled for constructed completion by February. > www.flsenate.gov/Senators/Find

Water Protectors needed at:

Sacred Water Camp Suwannee River (3243 91st Drive, Live Oak, FL)
Water is Life Camp (846 NW 120th Trail, Branford, FL)

COME CAMP WITH US! Primitive campsites. No alcohol/drugs. Nonviolence.
